Subject: Testimony on Bill #6050

As a resident of New Fairfield, who lives one street away from the New York State line, I am totally against putting tolls on Connecticut's borders. We already have a problem with trucks circumventing the weigh station at exit 2 on I-84. These trucks drive right by my house into Danbury by getting on I-84 at exit 5 to avoid the station, and I can foresee all types of vehicles driving through the same residential streets to avoid paying tolls. It will also be a loss of revenue for our state because our New York State neighbors are not going to pay a toll to shop at the Danbury Fair Mall.

Please consider the ramifications of putting tolls on our Connecticut highways.
